Associated with Southborough becoming certified as a Green Community

Speakers

Carl Guyer
Chairman

Southborough Green Technology and Recycling Committee

Kelly Brown

Central Massachusetts Regional Coordinator
Massachusetts Department of Energy Resources

Anita Haspiel

Rethinking Power Management, LLC

The Southborough Green Technology and Recycling Committee is holding a public meeting at the Southborough Public Library on January 19, 2012 at 7:30 PM. This meeting is an information session to provide residents of the town the opportunity become familiar with the State of Massachusetts Green Communities Program. There are now eighty four (84) towns and cities in Massachusetts participating in the program. The Green Technology and Recycling Committee believes Southborough should consider participating and encourages residents to learn more about this worthwhile effort.

The primary goals of the Green Communities Program are:

- 1) To encourage the growth of "Green" industry within the town
- 2) To reduce the town's operating costs
- 3) To reduce the life cycle costs of home ownership.

Please plan to attend and learn how Southborough can move forward in a more environmentally friendly manner.

 / Carl Guyer, Chair
